Office Action Summary	Application No. 10/784,588	Applicant(s) BEACH ET AL.	
	Examiner Andrew Lee	Art Unit 2416	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Last OA mailed in 10/28/08 is incorporated by reference.

Response to Arguments

2. Applicant's arguments filed 2/27/09 have been fully considered but they are not persuasive.

Re Claims 19-28, Applicant argues that "centralized filtering and forwarding of data to be transmitted to remote" is not found in Brederveld in view Arrowood . However, Brederveld teaches that the server communication with the remote unit via the wireless APs. Hence, the server supports centralized filtering and forwarding of data to the remote units. The claim lacks how the data is filtered or forwarded or has structure to further limit the claim. What is not explicitly expressed is "at least one destination table relating the remote units to the access points...". However, it is clear that in order for the data to be transmitted to the remote units, the Server would have had a table relating the requested data to the remote unit. In so doing, data can be transmitted to the individual remote units as opposed to be have being broadcast. In regards to the destination table associating the APs to the remote stations, Arrowood teaches that cost and complexity can be reduced by centralizing the functions into a management node. In so doing, duplication of the functions would not have been necessary in each of the agent nodes. With this teaching, at least one table relating the access point to the remote unit can be implemented into the server, thereby avoiding duplication of the same information in the APs. In so doing, cost and complexity is minimized at the APs.

Conclusion

3. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
